

Another step of innovation at Green-GO: The new *Stride Series*

The Stride Antenna

Key features:

- Compatible with WBPX wireless beltacks
- True Seamless roaming, all beltacks in a pool can freely move between all antenna's
- Up to 5 simultaneous WBPX connections to one antenna*
- Pools with up to 100 wireless beltacks
- Pools with up to 250 Stride Antenna's
- User interface with e-ink display for information and configuration
- RGB LED for device status
- Outdoor rated housing, Ip53
- Various mounting options, 3/8", M10 and VESA
- Dect antenna analyser mode to see and analyse the DECT spectrum utilisation

More about it:

By synchronising the antenna's, we can take the step to utilise the full potential of the DECT spectrum. This gives the possibility to seamlessly roam current WBPX beltacks across the new Stride Antenna. Furthermore it allows higher DECT device density, allowing more WBPX to be used simultaneous in the same area. Green-GO has also invested greatly in developing tools for intercom technicians to give insights in the utilisation of the DECT spectrum and RF coverage, enabling technicians to diagnose and understand possible culprits early.

Technical infos:

Power: USB-C (5VDC) or PoE (802af)
Consumption: 10W
Size: 140 * 140 * 53 mm
Weight: 360g
IP rating: Ip53

Green-GO is manufactured in the Netherlands by ELC Lighting bv
Agents in all countries: www.greengodigital.com
USA exclusive distribution: Nova Lume, Lewisville, TX
